May 2019 DXM Release Notes

Build 60354 on CMS Wednesday 05.01.18

This DXM release focuses on enhancements and improvements throughout the platform, updated tables, and a new image editing experience.
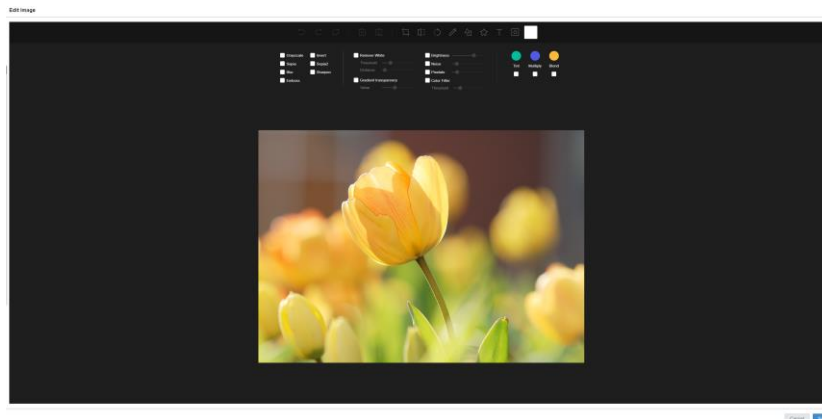

+ Release Highlights +

DXM Tables

All tables within the Reports section of the platform have been updated and improved. This update will empower users to access and use the information in the reports section in a manner that is even more timely and efficient. Some of the features include:

- Configurable and resizable columns
- Sorting
- Type-ahead search functionality
- Date picker
- Exporting data
- Accessing assets directly from reports

Image Editing Experience

We have implemented a new image editing tool within the platform. The updated image editing modal is a full-featured photo image editor, providing users the ability and freedom to fully customize and configure images to their specifications within the platform.
