December 2017 Release Notes

Build 12439 on CMS released Wednesday 12.13.17

+ Updates in this Release +

In our ever-expanding features released to V3, the User Group Manipulation and Version Compare are available this month.

User Group Manipulation

The manipulation of User Groups and associated members are available in V3 this month. This feature allows for the ability to add and remove specific members from User Groups.

To get started with User Group Manipulation follow these steps:
To add/remove specific users from the User Groups, complete the following:

1. Go to **[Settings] [Users / Groups] [Groups]**
2. Select and double click the group you want to edit
3. Click the **[Group Members]** dropdown within the edit modal
4. To remove users from a group, uncheck the member(s) from the bold (current members list). (Figure 1)

5. Click **[Save]** and members will no longer show as part of that group (Figure 2)

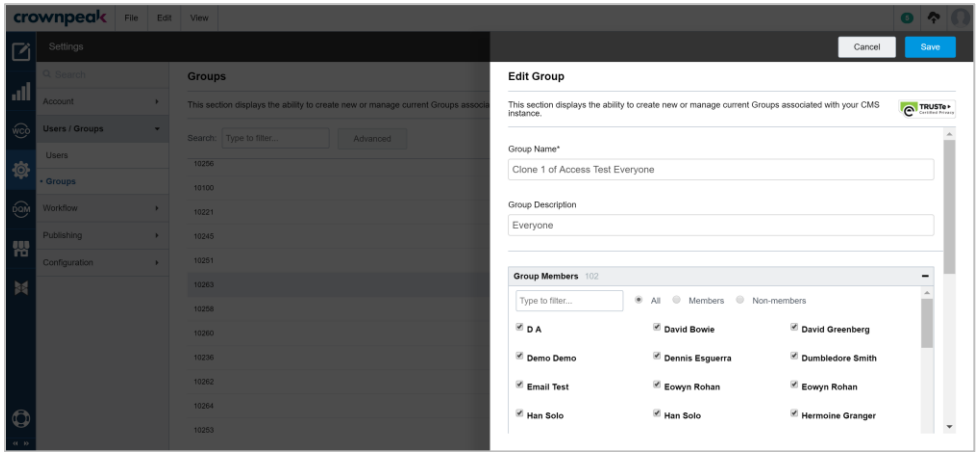

Figure 2 – Removing Members – User Groups

6. To add users to a group, check the boxes next to non-members (Figure 3)

Figure 3 – Adding Members – User Groups

7. Click **[Save]** and non-members will now show as part of that group (Figure 4)

Version Comparison

The Version Compare windows are available in V3 this month for source and content.
Both windows are important administrative features which allow you to compare two versions of an asset.

How do I get started with the Version Comparison?
To compare different versions of an asset, complete the following:

1. Go to **[View] [Properties]** to open the properties panel
2. Click **[Versions]** to open the Version Compare window
3. Check the boxes next to the two versions you would like to compare
4. To compare Content, click the **[Actions]** dropdown and select **[Compare Versions Content]** (Figure 5)
