

November 2018 DXM Release Notes

Build 40213 on CMS Wednesday 11.28.18

This DXM release focuses on enhancements and improvements throughout the platform.

+ DXM Improvements +

1. Option to have Workflow steps moved when reaching current step has been implemented, so that users can have more flexibility with their workflow process. (OCD-10696)
 - Add checkbox to 'Use a different workflow' when changing Workflows
2. Core Component - Color has been added to the Drag and Drop experience, so that users can create a consistent experience when using Drag and Drop. (OCD-10195)
 - Implement Color Component in Form View
3. Advanced Component – cp-list has been added to the Drag and Drop experience, so that users can create a consistent experience when using Drag and Drop. (OCD-10197)
 - Implement cp-list Component in Form View
4. V3 menus stays open when hovering over the tooltip for the active element. (OCD-11517) (CN - 00078658)
 - V3 Tooltips should not close drop-down menus
5. Properties panel is accessible through right-click menu of an asset. (OCD-9025)
 - 'Edit Properties' and 'Properties' will direct users to Properties panel after right-clicking menu of an asset
6. Advanced Component – cp-preview and cp-publish have been added to the Drag and Drop experience, so that users can create a consistent experience when using Drag and Drop. (OCD-10198)
 - Implement cp-preview and cp-publish Components in Form View

+ Other Improvements +

1. Image Files publish to correct servers. (OCD-11344)
2. View Output updates correctly when making a change to the developer's template. (OCD-9525)
3. Text within 'Associated Groups' displays correctly. (OCD-10977)
4. Access Panel is accessible after making edits to the Content Panel. (OCD-10853)
5. Drag and Drop Components have corrected indices applied so they can be updated correctly. (OCD-11531)
