## 1 Release notes

The **SocialWeb** module allows the integration and evaluation of user comments and reviews directly in your FirstSpirit™ client. This document describes the module's new functions and changes since the last release.

## 2 SocialWeb Version 2.1

### 2.1 Changes

#### 2.1.1 Updated for FirstSpirit™ 5.1 and 5.2

The module has been updated to work with FirstSpirit™ version 5.1 and 5.2

#### 2.1.2 ContentCreator

The modules functionality provided in the SiteArchitect (JavaClient) is now also available in the ContentCreator (WebClient).

### 2.2 Fixed bugs

ID	Role	Category	Subcategory	Description
1	All Users	Normal Usage	Deployed Pages	When a comment was rendered in the websites, linebreaks have been ignored. Now the comment is correctly formatted.
2	All Users	Normal Usage	Deployed Pages	It could happen in some cases that the captcha was invalidated before the check. This behavior has been fixed.

## 3 SocialWeb Version 2.0

### 3.1 Changes

#### 3.1.1 Sort order

The comments and ratings tables can now be sorted by column in ascending or descending order.

#### 3.1.2 Updated for FirstSpirit™ 5

The module has been updated to work with FirstSpirit™ version 5.

#### 3.1.3 The configuration

The configuration was moved from the **Server and Project Configuration** to the **Global Project Settings** within the Java client.

#### 3.1.4 Warning: MS SQL is not supported any more

The Database MS SQL Server has been removed from the list of supported databases.

#### 3.1.5 No Comments on Comments

The feature to reply to comments was not stable and has been removed.

### 3.2 Fixed bugs

ID	Role	Category	Subcategory	Description
1	Administrator	Administration	Web Service	The compatibility with the database types MySQL, Oracle and PostgreSQL was fixed.
2	All Users	Normal Usage	Web Service	A UTF-8 encoding problem in the web service has been fixed.
3	Editor	Normal Usage	Deployed Pages	The whole JavaScript part was refactored.
