

Release Notes for BP for FirstSpirit 4.23

Fixed Bugs

Summary	Short Description	Component/s
ContentCreatorClient script for Windows does not exit with code 1 in case of error	The runClient.bat file (called by the "ActivatePortalXml" step in FirstSpirit) returned a 0 errorlevel even if errors occurred during the activation. As a result, the step "ActivatePortalXml" was always displayed as "successful" even if errors were present in the log. This bug has now been fixed.	ContentCreatorClient
Embedded pages display blank page when optimized PCD creation is used	When using the optimized PCD creation feature, embedded portal pages could not be displayed by the HLPFS navigation connector due to an incorrect launch URL. This bug has now been fixed.	Business Package Core
