Fixed Bugs

Summary	Short Description	Component/s
Incorrect visibility for FirstSpirit start pages in portal	A FirstSpirit start page is invisible in the portal's navigation by default. By redefining the SAP's attribute "com.sap.portal.navigation.Invisible", it was possible to overwrite the visibility. For start pages representing a PCD object, this mechanism was faulty, i.e. such start pages remained invisible even though the SAP attribute indicated a visible value. This has been fixed.	Business Package Core
