July 25, 2018 Release Notes

Build 30276 on CMS released Wednesday 07.25.18

+ Updates in this Release +

1. Advanced Search - Within the CMS, you can save your Advanced Search criteria with a unique name and later reopen it as a report. Advanced Search allows users to narrow results to specific requests such as assets, published dates, and/or users who last edited files. By refining your search parameters, you can be sure the custom reports will include the data you desire instantaneously.
2. Updated error messaging for DAM panel when Root Folder is selected. (OCD-8511)
3. Admin can now edit the Identity Provider for specific users in V3. (OCD-4437)
4. Project Branches handle deleted Templates correctly when publishing. (OCD-8092)
5. The Form View of the Site Config is now accessible after installing a new CL 2.0. (OCD-8629)
6. Workflow filters with multiple validations can now be saved and/or updated. (OCD-8276)
