Memory	approx. 3 GB RAM	May vary
Free disk space	approx. 1 GB RAM	May vary
MS-SQL Server	2008 or newer	Optional, may use embedded database instead.
MySQL	5.6.0 or newer	Optional, may use embedded database instead.

1.2 Incompatibilities

This version of **FirstSpirit™** TranslationStudio is not compatible with versions 1.x.

Licenses issued for version 2.1.x or earlier cannot be read and a new license needs to be issued.

2 Fixed Issues

The following issues have been fixed:

1. Incorrect changes to FirstSpirit's export/import operation info file removed which may cause an out of memory error under certain circumstances.
2. SMTP mail sending fixed.

3 Known Issues

1. **FirstSpirit™** TranslationStudio requires page and section reference names to be lowercase alphanumeric and to (optionally) have an underscore character. This pattern will be used automatically when creating new pages or sections using ContentCreator or SiteArchitect. If you create sections or pages using the FirstSpirit API, you have to guarantee this pattern yourself. **Elements not following this pattern will not be processed by FirstSpirit™ TranslationStudio.**
2. Translatable XMLs **prior version 2.0.3** might not be processed anymore. You may need to resubmit these for translation due to significant reductions of the translatable XMLs.
3. Preview files stored **prior version 2.0.3** will not be used anymore.
4. Listable dataset fields created in FirstSpirit Version 4.x (i.e. CONTENTAREALIST etc.) will not be processed due to a change in their type attribute.

4 Acknowledgements

Due to the internal processing of FS_LIST and FS_CATALOG input components and potential non-existing fields in XML files using FirstSpirit's filesystem synchronisation feature, it is necessary to overwrite the target language xml file with the source's original and replace its target fields. Therefore, changes made to the target language's fields might be overwritten, e.g. manually added list entries. However, it is possible to restore previous versions using FirstSpirit's version history.

5 Help

The Technical Support of the e-Spirit AG provides expert technical support to customers and partners covering any topic related to the FirstSpirit™ product. You can get and find more help concerning relevant topics in the FirstSpirit™ community.
